open, we are much more liable to be affected by Poison Oak and Ivy and other dangerous plants. Workers in brass, copper, lead and zine have their health impaired and the blood supply poisoned through the absorption of fine particles of these metals and the acids used in pollabing and cleaning them. Inhalting the fames of lead give painters that pollabing and cleaning them. Inhalting the is mother disease that reaches the blood through the skin, and is a most obstituate one when it becomes family fixed in the system. After the poison has reached the blood and been disseminated throughout the system it is too late to resort to local applications. In many cases the blood is affected simultaneously with the appear ance of the rash or empition on the skin, and all efforts should be directed to the purification and building up of the blood. Ugly empitions and sores will continue to break out in spite of salves, washes, sorps or other external treatment.

S. S. S. is especially recommended for poisons of this character. So completely does it destroy the effects of the Oak and Ivy that there is no possibility of its reappearance, and it is equally as efficacions in brans or lead possessing or farber's titch; building up and purefying the blood and driving and of the circulation impurities of every kind, and removing every historial, sore or explain from the skin. There is no substitute for S. S. S. it is the only purely expeciable blood purifier known, and the safest and less in all constitutional or blanck diseases.
